Delete everything after the enacting clause and insert:

"Section 1. **SHORT TITLE.**

This act may be cited as the "A+ Energy Act."

**EFFECTIVE DATE.** This section is effective the day following final enactment.

Sec. 2. Minnesota Statutes 2022, section 216B.01, is amended to read:

**216B.01 LEGISLATIVE FINDINGS.**

It is the policy of this state to preserve a safe, reliable, and affordable energy system that facilitates the use of all available energy options. It is hereby declared to be in the public interest that public utilities be regulated as hereinafter provided in order to provide the retail consumers of natural gas and electric service in this state with adequate and reliable services at reasonable rates, consistent with the financial and economic requirements of public utilities and their need to construct facilities to provide such services or to otherwise obtain energy supplies, to avoid unnecessary duplication of facilities which increase the cost of service to the consumer and to minimize disputes between public utilities which may result in inconvenience or diminish efficiency in service to the consumers. Because municipal utilities are presently effectively regulated by the residents of the municipalities which own and operate them, and cooperative electric associations are presently effectively regulated and controlled by the membership under the provisions of chapter 308A, it is deemed unnecessary to subject such utilities to regulation under this chapter except as specifically provided herein.

Sec. 3. Minnesota Statutes 2022, section 216B.1691, subdivision 1, is amended to read:

Subdivision 1. **Definitions.** (a) Unless otherwise specified in law, "eligible energy technology" means an energy technology that generates electricity from the following renewable energy sources:

(1) solar;

(2) wind;

(3) hydroelectric ~~with a capacity of less than 100 megawatts;~~

(4) hydrogen, provided that after January 1, 2010, the hydrogen must be generated from the resources listed in this paragraph; ~~or~~

(5) biomass, which includes, without limitation, landfill gas; an anaerobic digester system; the predominantly organic components of wastewater effluent, sludge, or related by-products from publicly owned treatment works, but not including incineration of wastewater sludge to produce electricity; and an energy recovery facility used to capture the heat value of mixed municipal solid waste or refuse-derived fuel from mixed municipal solid waste as a primary fuel;

(6) nuclear;

(7) renewable natural gas; or

(8) an energy technology that offsets carbon dioxide emissions through carbon sequestration, carbon capture, or a similar technology, but only to the extent that carbon dioxide emissions are offset by the technology.

(b) "Electric utility" means a public utility providing electric service, a generation and transmission cooperative electric association, a municipal power agency, or a power district.

(c) "Total retail electric sales" means the kilowatt-hours of electricity sold in a year by an electric utility to retail customers of the electric utility or to a distribution utility for distribution to the retail customers of the distribution utility. "Total retail electric sales" does not include the sale of hydroelectricity supplied by a federal power marketing administration or other federal agency, regardless of whether the sales are directly to a distribution utility or are made to a generation and transmission utility and pooled for further allocation to a distribution utility.

**EFFECTIVE DATE.** This section is effective the day following final enactment.

Sec. 4. Minnesota Statutes 2022, section 216B.1691, subdivision 2e, is amended to read:

Subd. 2e. **Rate impact of standard compliance; report.** (a) Each electric utility must submit to the commission and the legislative committees with primary jurisdiction over energy policy a report containing an estimation of the rate impact of activities of the electric utility necessary to comply with this section. In consultation with the Department of Commerce, the commission shall determine a uniform reporting system to ensure that individual utility reports are consistent and comparable, and shall, by order, require each electric utility subject to this section to use that reporting system. The rate impact estimate must be for wholesale rates and, if the electric utility makes retail sales, the estimate shall also be for the impact on the electric utility's retail rates. Those activities include, without limitation, energy purchases, generation facility acquisition and construction, and transmission improvements. ~~An initial report must be submitted within 150 days of May 28, 2011.~~ After the initial report, a report must be updated and submitted as part of each integrated resource plan or plan modification filed by the electric utility under section 216B.2422. The reporting obligation of an electric utility under this subdivision expires December 31, 2025, for an electric utility subject to subdivision 2a, paragraph (a), and December 31, 2020, for an electric utility subject to subdivision 2a, paragraph (b) 2040.

(b) A report submitted under this subdivision must include an explanation of the electric utility's efforts to reduce carbon dioxide emissions and increase the use of renewable energy in its operations in a manner that does not adversely affect customer costs or the reliability of electric service to Minnesotans.

**EFFECTIVE DATE.** This section is effective the day following final enactment.

Sec. 5. Minnesota Statutes 2022, section 216B.243, subdivision 3b, is amended to read:

Subd. 3b. **Nuclear power plant; new construction prohibited; relicensing.** ~~(a) The commission may not issue a certificate of need for the construction of a new nuclear powered electric generating plant.~~

~~(b)~~ Any certificate of need for additional storage of spent nuclear fuel for a facility seeking a license extension shall address the impacts of continued operations over the period for which approval is sought.

Sec. 6. Minnesota Statutes 2022, section 216B.243, subdivision 8, is amended to read:

Subd. 8. **Exemptions.** (a) This section does not apply to:

(1) cogeneration or small power production facilities as defined in the Federal Power Act, United States Code, title 16, section 796, paragraph (17), subparagraph (A), and paragraph (18), subparagraph (A), and having a combined capacity at a single site of less than 80,000 kilowatts; plants or facilities for the production of ethanol or fuel alcohol; or any case where the commission has determined after being advised by the attorney general that its application has been preempted by federal law;

(2) a high-voltage transmission line proposed primarily to distribute electricity to serve the demand of a single customer at a single location, unless the applicant opts to request that the commission determine need under this section or section 216B.2425;

(3) the upgrade to a higher voltage of an existing transmission line that serves the demand of a single customer that primarily uses existing rights-of-way, unless the applicant opts to request that the commission determine need under this section or section 216B.2425;

(4) a high-voltage transmission line of one mile or less required to connect a new or upgraded substation to an existing, new, or upgraded high-voltage transmission line;

(5) conversion of the fuel source of an existing electric generating plant to using natural gas;

(6) the modification of an existing electric generating plant to increase efficiency, as long as the capacity of the plant is not increased more than ten percent or more than 100 megawatts, whichever is greater;

(7) a large wind energy conversion system, as defined in section 216F.01, subdivision 2, or a solar electric generation facility energy generating system, as defined in section 216E.01, subdivision 9a, if the system or facility is owned and operated by an independent power producer and the electric output of the system or facility:

(i) is not sold to an entity that provides retail service in Minnesota or wholesale electric service to another entity in Minnesota other than an entity that is a federally recognized regional transmission organization or independent system operator; or

(ii) is sold to an entity that provides retail service in Minnesota, or wholesale electric service to another entity in Minnesota other than an entity that is a federally recognized regional transmission organization or independent system operator, provided that the system represents solar or wind capacity that the entity purchasing the system's electric output was ordered by the commission to develop in the entity's most recent integrated resource plan approved under section 216B.2422;

(8) a large wind energy conversion system, as defined in section 216F.01, subdivision 2, or a solar energy generating large energy facility, as defined in section 216B.2421, subdivision 2, engaging in a repowering project that:

(i) will not result in the facility exceeding the nameplate capacity under its most recent interconnection agreement; or

(ii) will result in the facility exceeding the nameplate capacity under its most recent interconnection agreement, provided that the Midcontinent Independent System Operator has provided a signed generator interconnection agreement that reflects the expected net power increase;

(9) a nuclear-powered electric generating plant;

(10) a hydroelectric generating facility; or

(11) a biomass electric generating facility.

(b) For the purpose of this subdivision, "repowering project" means:

(1) modifying a large wind energy conversion system or a solar energy generating large energy facility to increase its efficiency without increasing its nameplate capacity;

(2) replacing turbines in a large wind energy conversion system without increasing the nameplate capacity of the system; or

(3) increasing the nameplate capacity of a large wind energy conversion system.

(c) The exemptions under paragraph (a), clauses (9) to (11), do not apply where the commission determines that it is not in the public interest.

**EFFECTIVE DATE.** This section is effective the day following final enactment and applies to a large wind energy conversion system, a solar energy generating system, a nuclear-powered electric generating plant, a hydroelectric generating facility, or a biomass electric generating facility whose owner has filed an application for a certificate of need with the Public Utilities Commission on or after that date."
